Hi guys, Really good job on your presentation. The style and information are great.

It looked like you have some results that are still under review and We at EPA were hoping you might be able to add some of those to your presentation. All these presentations will be framed as preliminary report outs, not drafts of any kind. The work is still in progress but we are sharing preliminary results. We want to give them something to chew on. I have attached the economic report as an example where he gave them some results. We don't want you to do 30+ slides as he did but hope that you might be able to add a few slides on the bear, wolf and caribou work that is in review by your contractor. I certainly understand if the time constraints are too severe. I will give Ann a call. Thanks
